

Margin Review

March – May 2026 · all marketplaces · prepared for Product, Procurement & Marketing

Net sales	Contribution Margin 3	Blended CM3%	Active SKUs
€7,273,537	€924,861	12.7%	223

Why we're meeting

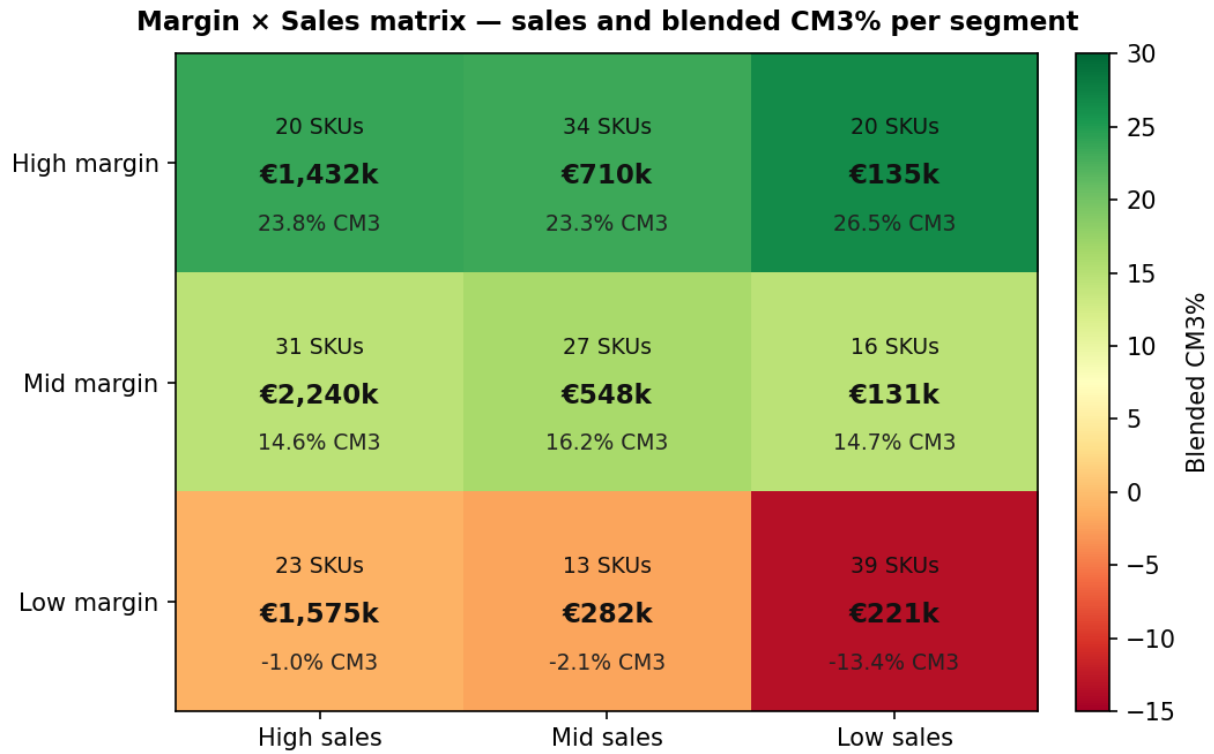

Over March – May 2026 the catalogue generated **€7,273,537** in net sales at a **blended CM3 of 12.7%** — well below the 19.7% target. The headline gap is concentrated, not spread evenly: a small group of high-revenue, low-margin SKUs is diluting the whole portfolio, while a healthy high-margin core is being under-scaled. This preread frames four product segments and the biggest month-over-month margin movers so Product, Procurement and Marketing can align on where to act first.

Headline takeaways

- **The margin drag is concentrated.** 23 'low-margin / high-sales' SKUs turn over €1,575,070 (22% of sales) at just -1.0% CM3 — they earn €-16,099 of contribution. Fixing these is the single largest lever.
- **The profitable core is solid but small.** 20 'high-margin / high-sales' SKUs deliver €340,866 of CM3 at 23.8% — protect price and availability here at all costs.
- **There is untapped upside.** 20 'high-margin / low-sales' SKUs already run at 26.5% CM3 but only €134,927 of sales — a marketing / merchandising scale opportunity with no margin risk.
- **Margins are trending down portfolio-wide.** Blended CM3 fell from 13.4% in Mar to 11.6% in May; the bottom-10 decliners (p.4) explain most of the slide.

Margin × Sales matrix

Every SKU is placed in a 3×3 grid: thirds by all-country CM3% (margin) and thirds by all-country net sales (volume). Cells show SKU count, total sales and the segment's blended CM3%.

Tier cut-offs (terciles): margin at 10.2% and 18.6% CM3; sales at €13,708 and €30,660 over the three months.

The four segments to discuss

Low margin · High sales

23 SKUs | €1,575,070 sales (22% of total) | €-16,099 CM3 | **-1.0%** blended margin

Biggest lever. High volume is actively destroying or barely making margin.

Procurement: renegotiate COGS / MOQs on these specific SKUs. **Product:** review pack size, bundle, or BOM cost. **Marketing:** cut ad spend / discount depth here — we're buying unprofitable volume.

Examples: Vegavero Bisglicinato de Magnesio | 40 (€229,491, -12.5%); MSM Polvo Vegavero | El Único PURO | 1 (€207,563, 5.6%); Astaxantina Biologica | Antiossidante (€122,285, 8.0%)

Low margin · Medium sales

13 SKUs | €282,326 sales (4% of total) | €-5,991 CM3 | **-2.1%** blended margin

Watch list. Mid volume, weak margin — fix or de-prioritise before they grow.

Procurement: include in the next cost review wave. **Marketing:** stop promoting until margin is repaired.

Examples: Complexe Cheveux | Fortifiant, Pousse (€26,021, -3.0%); Vegavero Vegan Collagen Supplement 200 (€25,808, 5.0%); Integratore Menopausa | Titolato in FI (€24,374, 10.1%)

High margin · Low sales

20 SKUs | €134,927 sales (2% of total) | €35,822 CM3 | **26.5%** blended margin

Scale opportunity. Great margin, under-exposed — grow with low risk.

Marketing: prioritise for ads, content and merchandising. **Product:** check availability / listing quality isn't the bottleneck.

Examples: Bio Johanniskraut hochdosiert | mit Pa (€13,101, 23.7%); Curcuma BIO Vegavero® | Dosage Élevé | (€11,458, 19.4%); Integratore Zinco + Magnesio + Vitamin (€11,407, 28.2%)

High margin · High sales

20 SKUs | €1,432,409 sales (20% of total) | €340,866 CM3 | **23.8%** blended margin

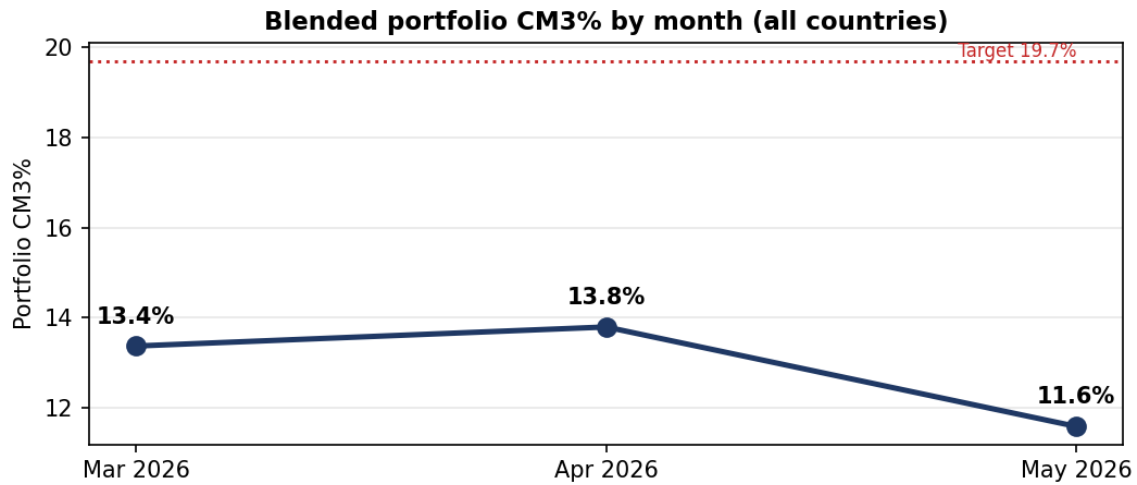

Protect. The profit engine of the catalogue.

All: defend price, buy-box and stock. **Procurement:** secure supply continuity; avoid stock-outs.

Examples: GLICINA Vegavero® | 1000 g (1 kg) in P (€364,246, 24.2%); Vegavero Saffron Supplement 90 mg | 3. (€122,861, 20.3%); Vegavero Myo-Inositol Komplex - 120 Ka (€122,217, 19.6%)

Margin trend — biggest movers

CM3% change from March to May per SKU (all-country, sales-weighted linear fit), limited to SKUs with at least €10,000 of net sales over the window so the list is material.
